

# KLYDE JOSEPH YABO

Software Automation Engineer | Python | JavaScript | Broadcast Automation

klydejosephy@gmail.com | +63 945 592 7782 | [github.com/klaayd39](https://github.com/klaayd39) | [linkedin.com/in/klyde-joseph-yabo](https://linkedin.com/in/klyde-joseph-yabo) | Malaybalay City, Philippines

## SUMMARY

Software Automation Developer specializing in Python, JavaScript, REST APIs, Playwright, WebSockets, and broadcast automation. Experienced in building real-time monitoring systems, AI-powered dashboards, workflow automation tools, and custom control systems for live broadcast environments. Passionate about automation, software engineering, and solving complex operational problems.

## EDUCATION

### Bukidnon State University

Bachelor of Science in Information Technology (2020 – 2024)

## EXPERIENCE

Software Automation & Systems Developer2022 – Present

Bombo Radyo Malaybalay

**Technologies:** Python, JavaScript, React, REST APIs, Playwright, WebSockets, OSC, Git, Linux

- Built Bombo News Intel, an AI-powered news monitoring dashboard that aggregates 50+ live intelligence feeds, reducing manual news tracking time by approximately 80%.
- Developed Nautel AUI Monitor, a real-time transmitter health dashboard with custom telemetry alerts, enabling 24/7 unattended monitoring and reducing equipment downtime.
- Designed Weather Overlay, a vector-based weather visualization engine with real-time REST API integration, deployed across live broadcast streams reaching 100K+ viewers.
- Programmed X32 Remote Toggle using OSC protocols for Behringer X32 mixers, achieving sub-50ms state synchronization and eliminating manual hardware switching.
- Developed OBS automation tools (Media Automator & OBS Scene Autosort) that reduced repetitive production setup time by approximately 70% and improved workflow consistency during live broadcasts.
- Created Drama Report Gen, an automated document engine that generates broadcast logs and performance reports, cutting manual data entry by approximately 90%.

IT Support & Hardware Technician

General IT Services

**Technologies:** Hardware Diagnostics, Network Configuration, Technical Documentation, Video Editing

- Performed diagnostic troubleshooting, component upgrades, and repair services for 30+ PCs and office printers.
- Installed operating systems, software packages, and system drivers, servicing 50+ local clients.
- Configured network routing and peripheral devices, improving workspace productivity for small offices.

## SKILLS

- Programming
- Python • JavaScript • JSON • REST API
- Frontend
- React • HTML • CSS • Vite
- Automation & Testing
- Playwright • WebSockets • OSC Protocol • Unit Testing • API Integration
- Tools & Platforms
- Git • GitHub • VS Code • OBS Studio • Linux
- IT & Infrastructure
- IT Support • Network Configuration • Hardware Troubleshooting • Technical Documentation

## SPECIALIZATIONS

- Stream & Broadcast Automation
- Real-time Monitoring Systems
- OSC / WebSocket Integration
- Telemetry & Alerting
- AI-powered Intelligence Tools
- Custom Scripting & REST APIs

## ACHIEVEMENTS

Athlete of the Year 2024 – Bukidnon State University
